Important Instruction to all LED Lamp Manufacturers & Permittee

With reference to the Item No. 6 (**Testing guidelines**), sub clause 6.4.4 of clause 6.4 of Schedule 20 of LED lamps, it is mandatory to submit the test report after 25% of declared life or 6000 hours of operation within 12 months of the date of approval.

Note: "The label will be withdrawn if the permittee fails to submit the test report of lumen maintenance after 25% of declared life or 6000 hours, within 12 months from the date of approval of label."

It may be noted that:

- (a) **For already approved models**, the link of uploading the test report has been made active and will expire automatically after the completion of 12 months from the date of approval of respective models.
- (b) **For fresh registrations**, the link will appear from the beginning i.e. if a manufacturer is having 6000 hours test report at the time of registration itself, he has an option to upload it at the same time. Whereas, if the same is not uploaded at the time of registration, the link will remain active for 12 months period from the date, the model gets approved.
